mock5 Q2 User, email

Problem

Create a relationship between Email - User account

one email address is associated with exactly one user account and each user account is identified by its email address.
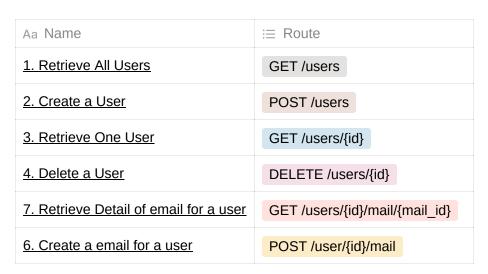

- You need to create two classes User and Email

- Form a one to one relationship between two tables

```
User
id
name
phoneNo
dateOfBirth
Email email

Email
mail_id
email
created_date
User user
```

Implement the following with the given routes :

User-Email (1)

Aa Name	☰ Route
1. Retrieve All Users	GET /users
2. Create a User	POST /users
3. Retrieve One User	GET /users/{id}
4. Delete a User	DELETE /users/{id}
7. Retrieve Detail of email for a user	GET /users/{id}/mail/{mail_id}
6. Create a email for a user	POST /user/{id}/mail
